Career Objective

Computer Science undergraduate (graduating May 2027) with strong foundations in backend engineering, distributed systems, and full-stack development. Experienced in building scalable REST APIs with Java and Spring Boot, event-driven pipelines using Apache Kafka, caching with Redis, and containerization with Docker. IEEE-accepted researcher in ML pipeline design and Explainable AI.

Education

Chandigarh University, Mohali, Punjab

| 2027

Bachelors of Engineering: Computer Science Engineering | CGPA: 8.03/10

Anand Swaroop Arya Saraswati Vidya Mandir, Roorkee, Uttarakhand

Intermediate (Class XII), CBSE | Percentage: 79 | 2023 Matriculation (Class X), CBSE | Percentage: 94.8 | 2021

Research & Publications

Explainable AI-Based Phishing Website Detection Using Feature-Driven Analysis

Accepted — IEEE OTCON 5.0, 2026 | Chandigarh University, Punjab, India

- Built end-to-end Python ML pipeline (XGBoost, LightGBM, CatBoost, Logistic Regression) on 549,346 URLs with domain-separated splitting to produce repeatable, high-quality evaluation results
- Designed feature extraction, normalization and evaluation protocols in Python (Pandas, Scikit-learn); XGBoost achieved AUC 0.921 and Recall 0.812 under realistic domain-split evaluation
- Integrated SHAP-based explainability for global and local feature attribution; research accepted at IEEE OTCON 5.0

Projects

ThriftBazaar | Java 17, Spring Boot, PostgreSQL, JSON Web Token (JWT), React, TypeScript, Docker, Cloudinary

| [Demo](#)

- Built full-stack B2C/B2B thrift marketplace with Spring Boot REST (Representational State Transfer) APIs and PostgreSQL; implemented role-based auth (CUSTOMER, VENDOR, ADMIN) via Spring Security with JWT tokens.
- Designed scalable backend with DTOs, Spring Data JPA, and Hibernate; built React/TypeScript frontend with seller dashboard and Cloudinary image upload.
- Optimized stock-based availability and cart logic handling concurrent user sessions, ensuring data consistency under peak load.
- Wrote JUnit tests for core REST API endpoints; validated end-to-end flows using Postman.

PrepWise | React, TypeScript, Node.js, Express, MongoDB, Docker, JWT, OAuth

| [Demo](#)

- LeetCode-style DSA interview prep platform with a structured 12-pattern curriculum covering 80+ problems with hints, editorials, and difficulty ratings.
- Built a sandboxed code execution engine supporting C++, Python, and JavaScript using Docker with resource limits and a concurrency queue for safe, isolated code evaluation.
- Implemented JWT authentication, Google/GitHub OAuth, role-based access control (Student/Recruiter/Admin), streak tracking, and per-test-case submission results.
- Deployed as a three-service monorepo (React + Vite, Express API, execution engine) across Vercel and Render with MongoDB Atlas and environment-based config management.

Languages: Java, C++, SQL (PostgreSQL, MySQL), JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, React, Microservices

Databases & Cache: PostgreSQL, MySQL, MongoDB, Redis

Messaging & DevOps: Apache Kafka, Docker, AWS (EC2), Git, Maven, Postman, CI/CD

Core CS: Data Structures & Algorithms, OOP, REST API Design, System Design, ML Pipeline Design

Testing & Quality: JUnit (unit testing for REST APIs), Postman API testing

Methodologies: Agile, Microservices Architecture, Spec-Driven Development

Soft Skills: Problem Solving, Communication, Team Collaboration, Analytical Thinking, Adaptability, Time Management, High Agility

Coding Profiles

LeetCode: https://leetcode.com/u/arnav_giri/ **HackerRank:** <https://www.hackerrank.com/profile/arnavgiri06>

Certifications

Data Structure and Algorithms using Java, Infosys Springboard

Oct 2025 – Nov 2025

- Solved 300+ algorithmic problems on arrays, strings, trees, graphs, and dynamic programming in Java

Spring and Angular Full Stack Developer, Infosys Springboard

July 2025 – Aug 2025

- Trained in Java-based full-stack development with Spring Boot backend services and Angular/TypeScript frontend frameworks

Cyber-Physical Systems with IoT Applications, 6 week Training

Jun 2025 – Jul 2025

- Built IoT-enabled smart farming system with automated data pipelines for real-time crop monitoring and sensor-based analysis

Additional Information

- Toycathon 2023 – Led a team to top 16 out of 125,000+ participants; secured copyright
- National Hackathon Winner, Shobhit University – Led a team and won against nationwide participants
- Captain, Haridwar Cricket Team – Led the U-19 team to finals for 2 consecutive years
- Vidya Bharti National Fare Competition – Participated for 6 consecutive years; won national 2 times
- NCC 'B' Certificate (A Grade) – Awarded Best Cadet of the Year for outstanding leadership, discipline, and performance
